**DETAILED ACTION**

1. This office action is in response to the Amendment filed December 17, 2008.

Accordingly, claims 12-15 were amended, claims 1-8 were cancelled, and claims 9-11 were withdrawn. Currently, claims 9-15 are pending in this application.

**EXAMINER'S AMENDMENT**

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was originated from Applicant's election without traverse filed on December 20, 2007.

In the claims:

Claims 9-11: cancel.

Claim 12: in line 16, after "switching liquid crystal" insert --panel--.

Claim 13: in line 17, after "switching liquid crystal" insert --panel--.

Claim 14: in line 14, after "switching liquid crystal" insert --panel--.

Claim 15: in line 15, after "switching liquid crystal" insert --panel--.

***Allowable Subject Matter***

3. Claims 12-15 are allowed.

The following is an examiner's statement of reasons for allowance: none of the prior art of record fairly suggests or shows all of the limitations as claimed. Specifically,

Re claims 12-15, none of the prior art of record discloses, in combination with other limitations as claimed, a 2D/3D switching type liquid crystal display panel including:

- a display-use liquid crystal panel capable of performing 2D display and 3D display, the display-use liquid crystal panel generating a display image in accordance with image data inputted;

- a parallax barrier which attains a 3D effect by giving a certain viewing angle to the display image at a time of 3D display; and

- a switching liquid crystal panel which switches between 2D display and 3D display by enabling or disabling an effect of the parallax barrier,

- wherein a liquid crystal layer in said one of the display-use liquid crystal panel and the switching liquid crystal panel having a transition point higher than that of a liquid crystal layer in the other; and

- wherein the switching liquid crystal panel, the parallax barrier and the display-use liquid crystal panel are positioned in this order from a light source emitting light that is incident onto the switching liquid crystal.

The most relevant reference, US 6,046,849 to Moseley et al. (Moseley), fails to disclose or suggest that the switching liquid crystal panel, the parallax barrier and the display-use liquid crystal panel are positioned in this order from a light source emitting light that is incident onto the switching liquid crystal. As shown in Fig. 4 of Moseley, the parallax barrier 4, the switching liquid crystal panel 11 and the display-use liquid crystal

panel 1 are positioned in this order from a light source 3 emitting light that is incident onto the switching liquid crystal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
